

A background image of a simulation lab. Several healthcare professionals in white coats and dark uniforms are gathered around a patient lying in a hospital bed. One person is using a tablet. In the background, there are educational posters on the wall, including one titled "FEEDING STATION" and another titled "PRESSURE AREA STATION" with the text "body the key areas pressure sores occur (there are 7 anterior and 9".

Professional Development, Simulation & Immersive Learning

Booklet

Empowering others with knowledge, skills, and confidence to deliver safe, high-quality patient care.

OVERVIEW

Empowering Excellence Through **Innovative Training**

At the Robert Jones and Agnes Hunt Orthopaedic Hospital NHS Foundation Trust our Professional Development Team is a driving force in clinical education. We combine expertise, innovation, and passion to shape the future of healthcare training.

With a wealth of experience and a forward-thinking approach we specialise in developing engaging, high-impact training packages for healthcare professionals. From essential clinical skills to a hybrid learning approach, our programmes seamlessly blend traditional classroom-based teaching with the power of extended reality—featuring simulation, virtual reality, immersive environments and in-situ simulations.

Partnering with our team means more than accessing high-quality education—it's about embracing a new era of learning. We prioritise hands-on experiential training, building confidence, teamwork and competence to support safe and effective care across all settings.

Whether you're upskilling a multidisciplinary team or introducing new standards of practice, trust us to deliver transformative learning experiences that inspire, inform, and elevate professional performance.

Our goal is simple: to empower every learner to succeed with confidence.

OUR SERVICES

Tailored Solutions for Your Learning Needs

Explore the cutting-edge training tools and spaces offered at our Simulation Lab and Training Rooms. From simulation rooms and immersive spaces, to dedicated debriefing rooms, our facilities support a wide range of training solutions. Learn about our available services, including scenario-based training, task trainers, and booking options for individual or team-based sessions.

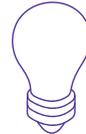

Design and Development

Every training package we create is thoughtfully designed and expertly developed to ensure it delivers real-world impact.

Meeting Learner Needs

We recognise that every learner is different, with unique experiences, learning styles, and professional goals.

Safer, Smarter Care

Investing in high-quality training is not just a commitment to staff development—it's a strategic decision that enhances patient safety and reduces avoidable incidents.

FEEDBACK AND EVALUATION

Hear from Our **Satisfied Learners**

The tutors are excellent and very informative about spinal injuries and AD.

– Autonomic Dysreflexia Interactive and Simulation

This course was brilliant, staff were great and very knowledgeable, I came away with a greater understanding of the different areas we covered.

– Step into Healthcare

Visually very good, easy to navigate, enjoyed the scenarios, enjoyed the interaction

– Delirium Interactive and Simulation

Interactive walls were brilliant when learning ECG. The session made much more sense and I felt more comfortable when I went back to my clinical area.

– ECG participant

I felt much more comfortable and confident putting the skills into practice. Training provided evidence based care ensuring high standards of patient safety. I was very nervous about doing simulations but really enjoyed the interactive training.

– Step into Healthcare

The most recent NHS England National Education and Training Survey (NETS 2024) highlights the strength of our learning culture, with **RJAH ranked 1st in the Midlands** and **2nd across the entire UK** for overall training quality. This independent feedback reflects not only the excellence of our education systems, but the calibre of our staff – highly skilled, well-supported professionals whose expertise directly shapes the experience of every student, apprentice and trainee who learns with us.
