

PORTABLE Hearing loops systems

The Trust has portable hearing induction loop systems available for patients to use.

If you need support with hearing, please can contact a member of staff or contact the PALS team on 01691 404606 so that support can be arranged.

For example if you are hard of hearing we can arrange that staff speak up when communicating or we can communicate with a relative. Alternatively a hearing loop can be set up on the ward or clinic for your assistance.

If a hearing loop is requested, these are available at switchboard and can be brought to a ward or department by a porter.

The hearing loop will be ready for use in seconds and has a range of around 1.2m. It is free standing and ideal to use on desks or tables. It is compatible with all NHS hearing aids.
